Press Release

Fueling Valves Just Got E/Z 'er!

Wauconda, IL:

DU-BRO has always been known for finding better solutions to common problems. This is definitely true with the new E/Z Fill Fueling Valve. This inexpensive gem works with both, gas and glo, and accommodates medium (3/32" ID) fuel tubing and it will work with models up to 1.20 size. Its built in cap will keep the valve free from debris and exhaust residue. The valve's simple design will allow for fueling and de-fueling without the worry of flooding the carb or the need for additional parts that could be lost or misplaced. The E/Z Fill Fueling Valve is simple and effective.

No. 996 E/Z Fill Fueling Valve Retail: \$8.95

For Release, October 2008
